Monarch Plasmid Miniprep Kit
Monarch Plasmid Miniprep Kit
Monarch Plasmid Resuspension Buffer (B1)
Monarch Plasmid Lysis Buffer (B2)
Monarch Plasmid Neutralization Buffer (B3)
Monarch Plasmid Wash Buffer 1
Monarch Plasmid Wash Buffer 2
Monarch DNA Elution Buffer
Monarch Plasmid Miniprep Columns
Monarch DNA Gel Extraction Kit
Monarch DNA Gel Extraction Kit
Monarch Gel Dissolving Buffer
Monarch PCR & DNA Cleanup Kit (5ug)
Monarch PCR & DNA Cleanup Kit (5ug)
Monarch DNA Cleanup Binding Buffer
Monarch DNA Wash Buffer
Monarch DNA Cleanup Columns (5ug)
Monarch Microfuge Tube EcoRack

Monarch Protein Separation Solution	T3062L	2986616

L'ADN et l'ARN purifiés avec les kits Monarch sont hautement purs et peuvent être utilisés dans une grande variété d'applications, y compris le séquençage, le clonage, la transcription in vitro et les manipulations enzymatiques. Disponibles pour les minipreps plasmidiques, l'extraction de gel, le nettoyage de PCR, la purification de produits de transcription mais aussi l'extraction totale d'ARN ou d'ADNg, les kits de purification NEB sont tous conçus dans une optique de développement durable : réduction de plastique et emballages issus de sources responsables et recyclables.
